

Initiation of IVF in Iran

Book Title: Initiation of IVF in Iran

Author: AboTaleb Saremi, MD

First edition: 2013 Second edition: 2014

Price: 200000 Rails

Book Description:

Although this book, at first glance seems to be a biography, but at heart, this is a unique book about Dr. Saremi (founder of infertility treatments and IVF in Iran) and also his pioneering work who initiated IVF in Iran. It remains Dr. Saremi's extraordinary foresight that marks him out so vision and intellectual rigor not just in his work but also in his pioneering work in the public communication of science. Dr. Saremi's life, his struggles, his tireless and intense interest in the quest of reproductive issues as well as his deep interest in teaching the youth, and his commitment to the scientific progress of his country provides a living example and model for the medical students.

Another remarkable point is that the author has written this book in his statement, despite use of technical terms, he has complied verbal fluency. This book also has glance at the reproductive health situation in the next decades.
